

# GRONEN 2020

Lisbon, June 17-19 (virtually)

## #PROGRAM INFO

### #Format

- ◆ GRONEN takes places on [ichair.org](https://ichair.org), a virtual platform to navigate the conference program.
- ◆ Registered participants will receive **log-in data in a separate email** shortly before the event.
- ◆ Video **conferencing rooms allow for up to 50 participants** (of which 12 will be shown with videos and the rest joins using audio).
- ◆ **There will be video tutorials** and the option to sign-up for a **demo session** in early June.

### #Session Guidelines

- ◆ Per session, we will discuss **up to 3 papers**. There will be a session chair and a technical session chair, meaning someone from the organizing team is there to help you with any technical matters.
- ◆ To ensure a good discussion, we will assign **you to discuss one other paper** in your session.
- ◆ This is the general structure of a **virtual session**:
  - 10 min. intro + netiquette
  - 3 x 20 min. paper presentations
    - 15 min. presentation (max. 10 slides, close with 3 questions that would help you to develop the paper)
    - 5 min. feedback discussant (a prepared discussion; no PPT needed)
  - 10-15 min. group discussion
  - 5-10 min. closure/go-to-next-session
- ◆ **Papers will be made available** on the platform. Should you not want that, **you can opt out**. We expect, however, that you allow us to share your paper with the other authors in your session.

### #Engage

GRONEN has always supported a bottom-up approach to engage in the network. In the program, you will find several time slots where **you can co-design the program**:

- ◆ Is there a specific topic you would like to discuss in an online roundtable?
- ◆ Do you want to host a social for an interest group?
- ◆ Are you willing to offer an open office hour for mentoring younger scholars?
- ◆ Would you like to record a short video statement on a specific initiative or topic?

Please feel free to reach out! We will help to set it up on the platform and promote it among participants.

**Sustainable Business Design with Business Model Patterns**

*Florian Lüdeke-Freund*

In this interactive session we will explore a new toolbox consisting of 45 sustainability-oriented business model patterns. These patterns address ecological, social, and economic problems and help business designers in developing business models with the potential to contribute to sustainable development. In a short exercise, participants will use the patterns to ideate business model solutions to a pressing sustainability issue.

**Embracing emerging technology for reimagined work and identity:** [THEME2020](#)

*Cristyn Meath*

The goal of this workshop is to reflect on the experience of virtual conferencing and virtual reality to vision and strategize the potential for the technology to reimagine academic work and identity (what we do and how we do it). Participants will have the opportunity to attend a digital 3D conference world built for GRONEN2020 prior to the session. The session itself will be held in the virtual reality conference world. This will be accessible through 3D goggles and in 2D from a desktop or laptop.
